Your partner
for optimal climate solutions.

Biddle:

your partner
for optimal
climate solutions.

For more than 50 years Biddle has manufactured and delivered a competitive portfolio of climate separation and climate control equipment product and solutions.

Biddle is recognized world-wide as a leading company specialising in the supply of innovative heating, ventilation, cooling and air curtain solutions.

Biddle's products are used in a wide range of applications including retail, public buildings, offices, industrial premises and cold stores.

climate solutions
comfort

customized concepts

Biddle is more than a supplier of climate equipment.

Biddle aims to be a partner for customers throughout the life of the product.

Needs are identified thoroughly by working together to create the desired and optimal climate solution.

By offering our own products and those of carefully selected third parties a complete packages of climate solutions can be offered. At each step of the project, from identifying the need, installation of products, to after sales, Biddle can offer a solution to meet your needs.

worldwide
extensive network

international network

Biddle exports products to more than 25 countries via factories in the Netherlands and UK.

Biddle has dedicated sales offices in Germany, France, Belgium, The Netherlands, UK and Canada and an extensive network of partners world-wide. This strategy has strengthened the position of Biddle as innovation leader in the climate field.

energy savings

Energy saving products are becoming more and more important.

Biddle has developed some revolutionary technologies which are integrated in the products leading to significant CO₂ reductions.

Biddle also respects the environment by using environment-friendly materials and components with a long life whenever possible, and by supplying products with low-energy consumption.

innovation and market conformity

In developing innovative climate products and solutions to meet market needs, Biddle also engages third parties to obtain a wider scope of the specialised field.

Biddle is in close contact with technical universities and research institutes in the Netherlands and the rest of Europe.

In particular the cooperation with TNO (Dutch organisation for applied scientific research) for the development of new products and technologies ensures you will be choosing for advanced climate equipment that is designed to create optimum comfort in your work environment.

competences market research

close to the market

To be able to fulfil the market's wishes and needs, Biddle closely monitors every development and market trend in the climate sector.

Market research, product development, production, advice, sales and service are all key competences of the company and by keeping control of all of these functions Biddle can deliver perfect, high-quality climate solutions at an affordable price.

Continuous concept development enables Biddle to achieve optimal climatic conditions in countless situations.
